are catalogued, discussed, and illustrated in full color

### ORDER FORM

#### Description

Published jointly by J.-P. Wayenborgh Verlag and the ANS, *Ophthalmologia, Optica et Visio in Nummis* catalogues roughly 1,700 objects in 14 chapters each of which focuses on a discrete topic, e.g., ophthalmologists, ophthalmological congresses, the blind (and their rehabilitation), optical instruments (including spectacles), and the eye as a symbol. Appearing as volume 13 in the supplemental series to Julius Hirschberg's *History of Ophthalmology*, the book also serves to situate the objects within the larger historical context of the ophthalmological and optical disciplines.
